Missouri Department of Natural Resources
Water Protection Program

Submitted: July 14, 2005

Stream Description – WB ID: 0715 – Richland Creek

Richland Creek (WB 0715) is a four mile Class C stream. The water body is located in central Callaway County at the northern edge of the Ozark Border physiographic region (Thom and Wilson 1980). The Ozark Border physiographic region includes the rugged river hills with deep, relatively productive soils along both sides of the Missouri River and extending along the lower Mississippi River on the eastern border of the state to the Mississippi Lowlands physiographic region. The Missouri River Section of the Ozark Border region is characterized by streams flowing to the Missouri River. The dominant topography of the region is highly dissected gentle rolling plains. Soils range from deep productive loess soils to shallow soils derived from bedrock.

Richland Creek is the receiving water body for Mac's Mobile Home Manor (MO0101052). The classified reach runs from the Highway 54 bridge (site # 1) and flow south east to join Maddox Branch, which combine to form Crows Fork Creek. The effluent from the Mac's Mobile Home Manor enters Richland Creek near of site # 1. Three sites of the stream were assessed for physical characteristics. During this assessment, the assessment team did not find sufficient depth to support whole body contact recreation (maximum depth of at least one meter or average depth of at least ½ meter.)

Thom, R. H. and J. H. Wilson, 1980. The Natural Divisions of Missouri. Trans. Mo. Acad. Sci. 14: 9-23

Note: During the first visit to each site, ERC selected an assessment location (either upstream or downstream) based on which side appeared deepest and or most likely for whole body recreation.

Field Data Sheets for Recreational Use Stream Surveys

Data Sheet A: Water Body Identification

Water Body Name: Richland Creek
8 – digit HUC: 10300102
Missouri WBID # 0715
County: Callaway
Upstream Legal Description: Sec. 29, T48N, R9W Callaway County
Downstream Legal Description: Sec. 35, T48N, R9W, Callaway County
Upstream Coordinates: Latitude 38.9008271° N , Longitude 91.9428257° W
Downstream Coordinates: Latitude 38.8876271 ° N , Longitude 91.8939351 ° W
Discharger Facility Name(s): Mac's Mobile Manor
Discharger Permit Number(s): MO0101052

NOTES:

Site Descriptions

Site #1: Site #1 of Richland Creek is located off Highway 54 on Mac Road, and is the farthest upstream site of the classified reach. Surrounding conditions at this site include a trailer park, the Highway 54 overpass, and large wooded areas. Steep banks line the stream on both sides, making the stream difficult to access. The water at this location was moderately turbid throughout the assessment period.

Site #2: Site #2 of Richland Creek is located on County Road 116. The surrounding conditions include wooded areas, pastures, clay pits and the county road. Steep banks at the site make the stream difficult to access.

Site #3: Site #3 of Richland Creek is located on County Road 105. The surrounding conditions include farm pastures and large wooded areas. The stream is used for livestock watering at this site, and is completely fenced off.

I, the undersigned, hereby affirm to the best of my knowledge, that all information reported on the UAA datasheets, are true and accurate.

Summaries of Interviews

The following interviews were conducted by Abby Welschmeyer and Anna Welschmeyer with landowners and creek users during the months of May and June of 2005. Questions were asked of the interviewee either in person or over the phone, and survey sheets were completed based on the information acquired by the interviewer. The questions asked are as follows:

- How long have you lived near this body of water?
- Do you or your family utilize this body of water for recreational activities?
- If not used, why?
- If used, what types of activities, what season, how many times per period, and what flow conditions (low, medium, or high)?
- Have you witnessed other people utilizing the water body? (If so, the aforementioned questions apply.)

To assist in the collection of interviews, letters were developed detailing the water quality rule, our affiliation with the Missouri Department of Natural Resources and our contact information. These letters were left at residences nearby the water body where no one answered the door. This turned out to be a very effective way of quickly collecting key interviews of people most familiar with the resource.

Date: 06/30/05

Time: 1:26 PM

Name: William Backer

Reason for Interview: owns land near water body – phone interview

William Backer has owned land along Richland Creek for 40 years, and owns approximately $\frac{3}{4}$ of a mile along its banks. He does not use the stream for recreational purposes because of lack of water depth, and he stated that he doesn't pay much attention to the creek. Mr. Backer has not seen anyone else utilizing the stream and assumes that it is because there is not much depth in the stream.

Date: 05/25/05

Time: 10:31 AM

Name: Gary Galeski, Sr.

Reason for Interview: lives near site #2

Gary Galeski has lived near Richland Creek for ten years. He does not use the stream for recreational activities because he does not have the need. Mr. Galeski has not seen anyone else using the stream.

Summaries of Interviews (cont'd)

Date: 05/25/05

Time: 11:13 AM

Name: Gary Blackburn

Reason for Interview: lives near site #2

Gary Blackburn has lived near Richland Creek for seven years. He does not use the stream because he would have to cross property lines in order to do so, and he says that has no reason to use it. Mr. Blackburn has not seen anyone use the water body for recreational activities. He stated that the stream is for observational purposes only.

Date: 06/29/05

Time: 3:35 PM

Name: Lee Roy Miller

Reason for Interview: owns land near site #2 – phone interview

Lee Roy Miller has lived near Richland Creek for 48 years. He does not use the stream for recreational activities because he does not have the need to do so. Mr. Miller stated that he has not seen anyone else use the stream, and speculated that that was because there is not enough water in the stream.

Date: 05/25/05

Time: 10:15 AM

Name: Raymond Clingman

Reason for Interview: lives between sites #2 and #3

Raymond Clingman has lived near Richland Creek for 55 years. He does not use the stream for recreational activities because he does not need to do so. Mr. Clingman also stated that he has not seen anyone else use the stream for recreation.

Date: 05/25/05

Time: 9:49 AM

Name: Alfred Cassmeyer

Reason for Interview: lives near site #3

Alfred Cassmeyer has lived near Richland Creek for 47 years, and occasionally uses the stream for fishing. He stated that he has not seen anyone using the stream because it lacks sufficient depth. He then contradicted himself by stating that people swim in a hole in the stream and wade in the rest of the stream when it isn't flowing. Mr. Cassmeyer also said that none of the stream is over two feet deep.

Summaries of Interviews (cont'd)

Date: 05/25/05

Time: 9:55 AM

Name: David Renner

Reason for Interview: lives near site #3

David Renner has lived near Richland Creek for 62 years and was at a neighbor's house (Alfred Cassmeyer's) at the time of the interview. He does not use the stream for recreational activities because it lacks sufficient depth. Mr. Renner stated that he has not seen anyone else using the stream for the same reason he does not use it.

Date: 06/29/05

Time: 3:46 PM

Name: Frank Griffith

Reason for Interview: lives near site #3 – phone interview

Frank Griffith has lived near Richland Creek for 57 years. He does not use the stream for recreational purposes because it lacks sufficient depth. Mr. Griffith stated that he does not go to the creek because there is not a hole deep enough for swimming. He commented that he has not seen anyone else using the stream for recreation.

Date: 06/29/05

Time: 3:40 PM

Name: Ed Books

Reason for Interview: owns land/lives near site #3 – phone interview

Ed Books has lived near Richland Creek for 56 years. He does not use the stream for recreational activities because it lacks sufficient depth. He has seen his neighbor fishing from the stream occasionally during the summer months, but has not seen anyone in the water.

Date: 05/25/05

Time: 10:05 AM

Name: Barbara A. Ketterman

Reason for Interview: lives near site #3

Barbara Ketterman has lived near Richland Creek for 40 years. She does not use the stream for recreational activities because she has a pool in her yard and no longer has children at home to fish from the stream. Ms. Ketterman stated that she has not seen anyone else using the stream for recreation.
